Dual Seal Bio-Reactor Drive Unit

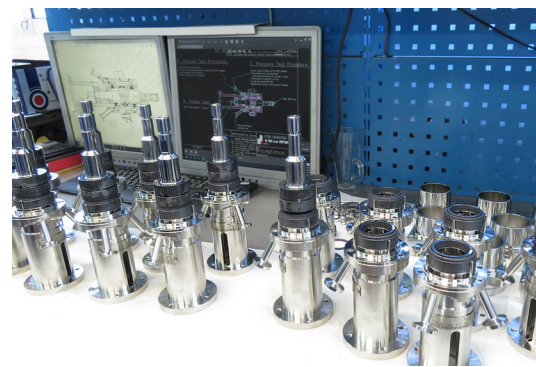

A worldwide leading life science equipment company, Eppendorf, is a customer of Ettem Engineering for over 20 years.

We supply them two models of drive units (DU) for Bio-Reactors. It includes mechanical seals, bearings, and additional fine mechanical components.

The Bio-Reactors are used in laboratories worldwide, in the view of the current global sharp rise in the demand for medical and laboratory equipment, we were requested to instantly double our production capacity.

Ettem immediately geared up for the challenge in cooperation with all its supply chain.

First batch is going to be delivered by the end of this month and the rest of the open order will be shipped by September.

Operating Conditions

Speed (up to)	300 RPM
Pressure (up to)	100 PSI
Temperature (up to)	300 °C
Media	Biological fluids
