The P7159 range: Broad chemical compatibility

Media-separated solenoid valves for aggressive media with a pressure range of vacuum up to 1 bar.

Its body, structure, diaphragm, and materials offer broad chemical compatibility. The 4-mm orifice reduces the risk of obstruction when using non-homogeneous liquids.

The valves are suitable to shut off, mix, or dose liquids and gases.

Applications

- **Instrumentation:** biotech, water quality and osmosis
- **Medical equipment:** biofluids dosing, disinfection, blood analyzer, dental equipment
- **Food and dairy:** additive mixing, cleaning, filling, dosing
- **Agriculture:** additive mixing, fertilizer dosing, water management
- **Industrial:** chemistry, perfume, ink

Built to Need

We adapt the valve to your particular project needs: pressure and flow, controls, or integrations.
